

### **HM-AI-Camera**

Al-powered License Plate Recognition Camera

- Superior Image Quality
- Trafic Violation Detection
- Al-powered LPR
- Traffic Flow Statistics
- Easy Deployment

The Hypermicron HM-AI-LPR Camera family is a next-generation solution designed for comprehensive road traffic monitoring, these cameras merge top-tier imaging, smart analytics, and robust construction to deliver reliable performance in diverse environments.

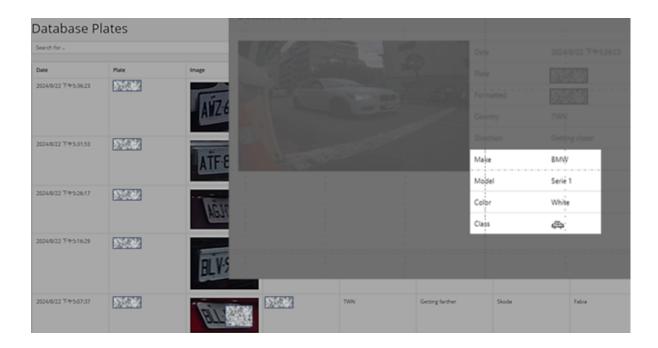

#### **Traffic Violation Detection**

Leveraging advanced AI, these cameras accurately detect and alert on various traffic infractions—including vehicles without plates, lane-specific violations, reverse driving, black/whitelist breaches, and other event triggers based on identified vehicle features.

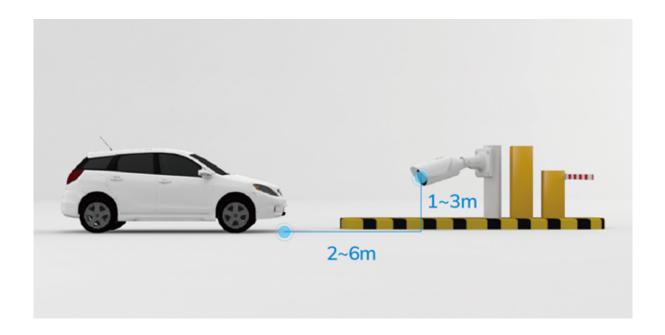

## **AI-powered LPR**

The HM-AI-LPR series not only reads license plates with high accuracy but also identifies vehicle type, color, and direction. This multifaceted analysis enhances access control and provides valuable forensic data, making it ideal for smart city applications.

## **Traffic Flow Statistics**

Detailed traffic analytics are built into the system, with vehicle counts segmented by type, make, and other attributes. These statistics are clearly displayed in live views and can be compiled into insightful reports to support data-driven traffic management decisions.

# **Designed for Broad and Easy Installation**

Designed with user-friendly installation in mind, the cameras feature standard junction box mounting options for flexible setups. Their flagship housing meets IP-67 and IK10 standards, ensuring superior weatherproofing and durability under harsh environmental conditions.
